Safe Harbor Statement

This presentation contains certain forward-looking statements.

These forward-looking statements may be identified by words such as 'believes', 'expects', 'anticipates', 'projects', 'intends', 'should', 'seeks', 'estimates', 'future' or similar expressions or by discussion of, among other things, strategy, goals, plans or intentions. Various factors may cause actual results to differ materially in the future from those reflected in forward-looking statements contained in this presentation, among others:

1. pricing and product initiatives of competitors;
2. legislative and regulatory developments and economic conditions;
3. delay or inability in obtaining regulatory approvals or bringing products to market;
4. fluctuations in currency exchange rates and general financial market conditions;
5. uncertainties in the discovery, development or marketing of new products or new uses of existing products, including without limitation negative results of clinical trials or research projects, unexpected side-effects of pipeline or marketed products;

6. increased government pricing pressures;
7. interruptions in production
8. loss of or inability to obtain adequate protection for intellectual property rights;
9. litigation;
10. loss of key executives or other employees; and
11. adverse publicity and news coverage.

TTY Biopharm cautions that this foregoing list of factors is not exhaustive. There may also be other risks that management is unable to predict at this time that may cause actual results to differ materially from those in forward-looking statements.

You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date on which they are made. TTY Biopharm undertakes no obligation to update publicly or revise any forward-looking statements. Any statements regarding earnings growth is not a profit forecast and should not be interpreted to mean that TTY Biopharm's earnings or earnings per share for this year or any subsequent period will necessarily match or exceed published earnings or earnings per share forecasts of TTY Biopharm Company Limited.

Our Mission

We have been striving to extend liposomal & microsphere depot platform technologies for treatment of various diseases.

Our Target is to improve health and quality of life through innovative, cost-effective therapeutics and specialty drugs.

Our focus is on the **“Unmet Medical Needs”** in challenging diseases throughout the world, such as Cancer, CNS, Autoimmune, Diabetes Mellitus & Infectious Diseases.

Company Overview

- **Founded in 1960, restructured in 1996**
- **Traded in the Taiwan TPEX (2001, Code: 4105);**
Shares outstanding: 248 Million Shares (March, 2017)

- **TTY Biopharm consolidated sales as of 2016- NTD 3.80 Billion, USD 117 Million**
- **Headquarters: Taipei, Taiwan**
Number of employees: 508

- TTY Biopharm is a global leader in Super-Generic Drugs and novel specialty/ bio-drug development with strong growth potentials (targeting for 20% sales CAGR in 2014-19).
- TTY is Taiwan's largest biotechnology conglomerate with the most completed biotechnology products pipeline including oncology drugs, new formulations, ... etc.
- Market cap US\$906mn. As of 2/24/2017
- Currently has three major subsidiaries (base on 12/31/2016):
PharmaEngine (listed), Market cap US\$689mn, 19.30% ;
TSH Biopharm (listed), Market cap US\$85mn, 56.48%;
CY Biotech, 27.54%
- Shareholder value creation-
 - TTY's ROE 19.5% in 2011-2016, ROE 21.4% in 2016 (above industry average 7.35%).
 - TTY targets for 28%-35% ROE in 2017-2020.
 - TTY aims to be a world-class biotechnology public listed company with multi-bn market capitalization in coming years.

Introduction of MS's MoA

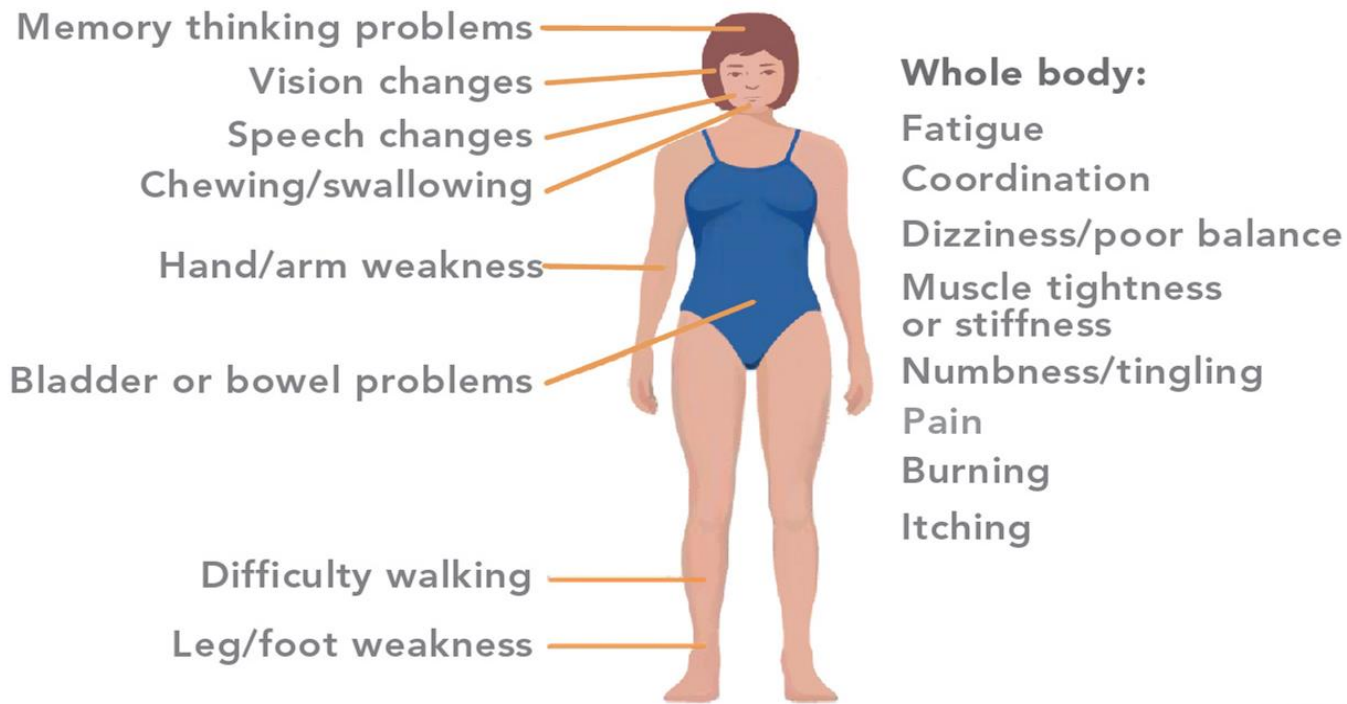

Introduction of MS

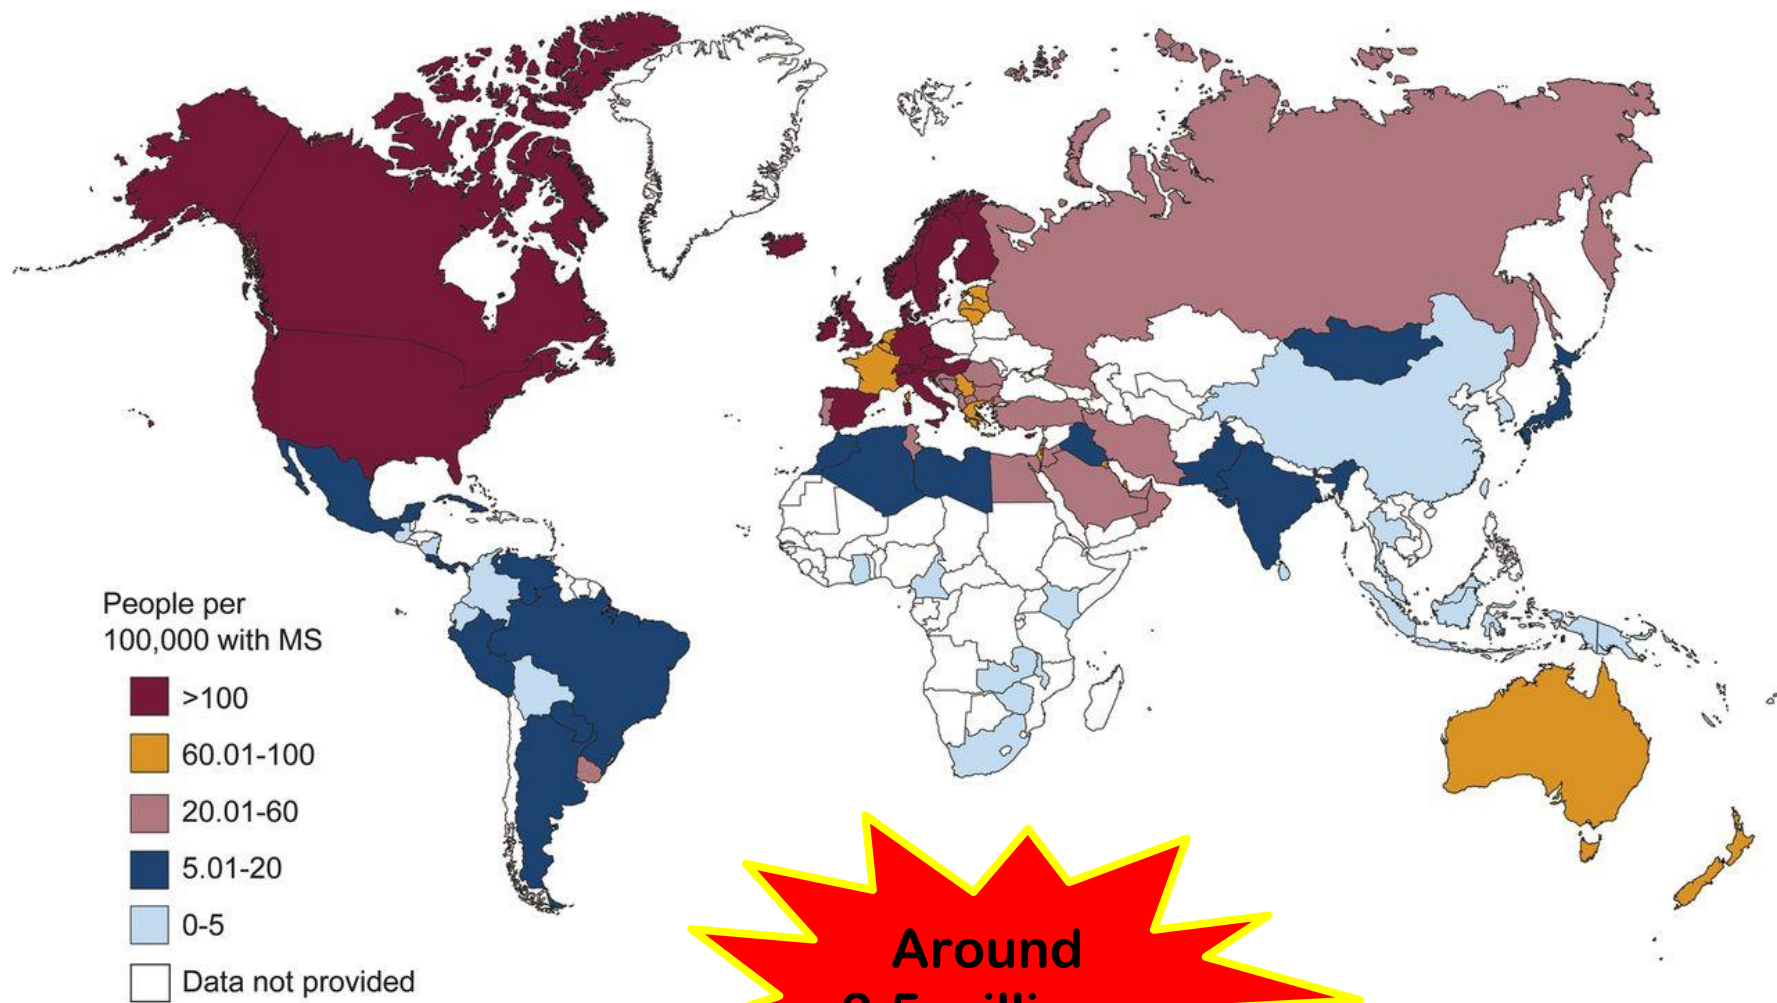

MS: a chronic, autoimmune & neurodegenerative disorder

Body's own defensive system attacks myelin

- Inflammatory damage in the brain and spinal cord
- Loss of myelin and axons (scars at multiple sites)
- Neurologic disability

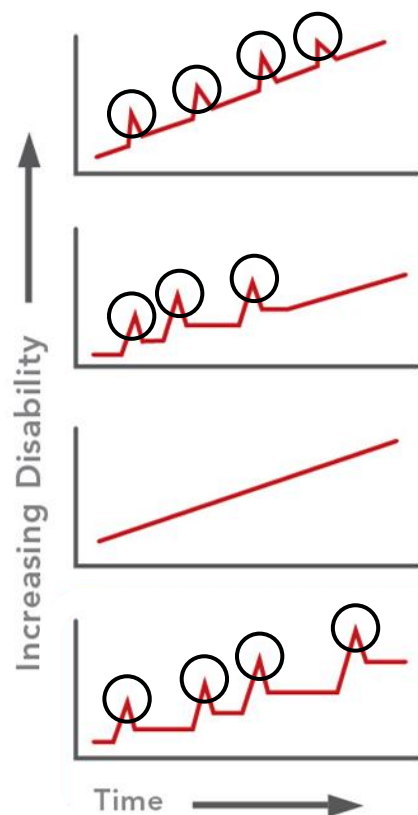

Introduction of MS

**Around
2.5 millions**

Introduction of MS

Four Classifications of MS

PRMS Progressive Relapsing MS
Steady decline since onset with super-imposed attacks.

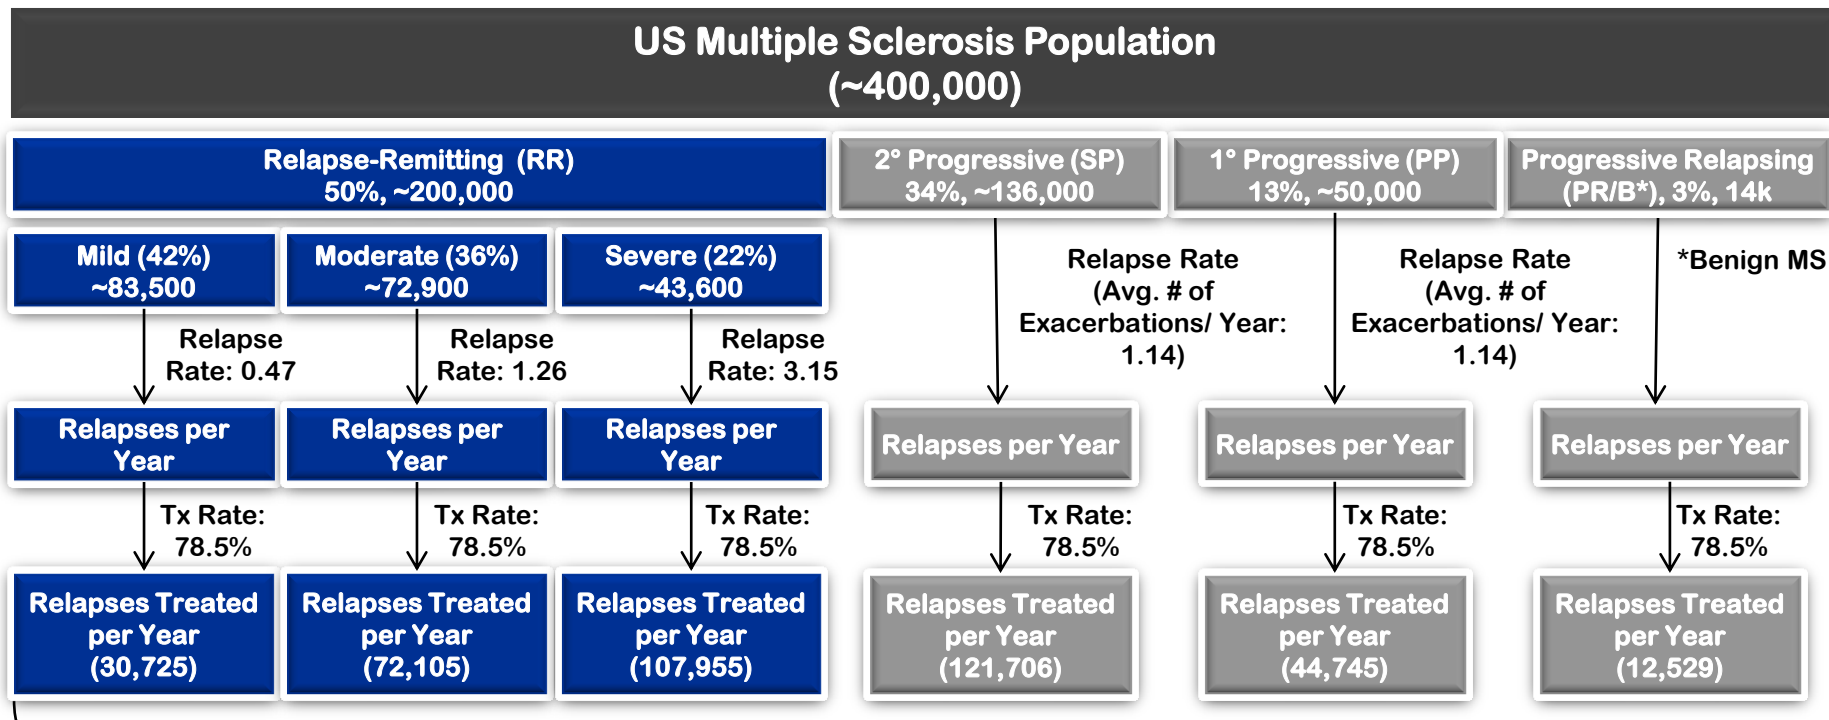

SPMS Secondary Progressive MS
Initial RRMS that suddenly begins to decline without periods of remission and relapses.

PPMS Primary Progressive MS
Gradual progression of the disease from its onset with no relapses or remissions

RRMS Relapsing/Remitting MS
Unpredictable attacks which may or may not leave permanent deficits followed by periods of remission

Either one of the four classifications occurs in acute is the target patient pool of 2B3-201.
不管屬於哪一個發病類型，只要是急性復發，就是2B3-201的target 病患。

Patients Distribution in US Market

Minimum, Target, and Ideal Penetration Rates based on Use as First-Line or Second-Line Treatment from Physician Survey

Relapses Treated with 2B3-201 at Peak Under Minimum, Target, and Ideal 1st-Line/ 2nd-Line Penetration Scenarios

Introduction of MS

DH Primary Research, Ann Indian Acad Neurol. 2011 Jul.;14(Supp1 1):S65-9

2B3-201 Pipeline

2B3-201 : Liposomal Methylprednisolone Injection (glutathione PEGylated liposomal methylprednisolone)

	2014 - 2016			2017			2018			2019			2020			2021			2022

US NDA indication #1																					█	█	
EU MAA indication #1																						█	█

Introduction of the Product

Targeting Liposomal Methylprednisolone Injection (glutathione PEGylated liposomal methylprednisolone) is being developed for patients suffering from acute and chronic neuro-inflammatory diseases, with an initial focus on patients with acute MS relapses.

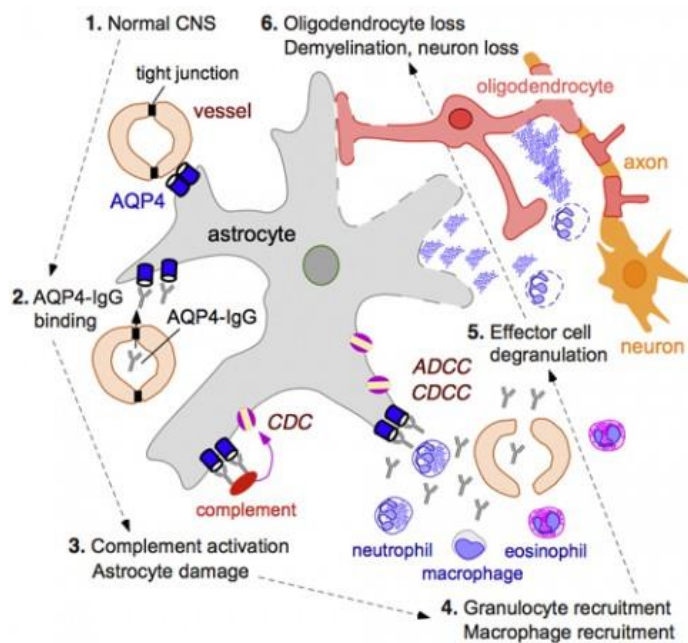

2B3-201

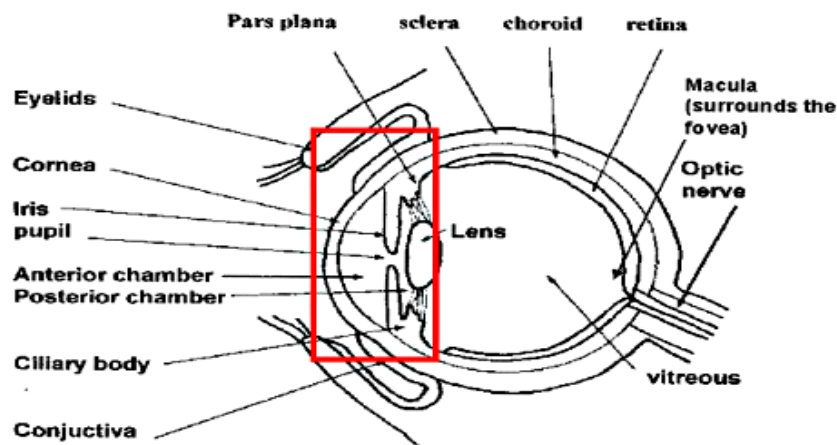

Introduction of the Product

2B3-201's potential indications

Neuromyelitis Optica

Uveitis

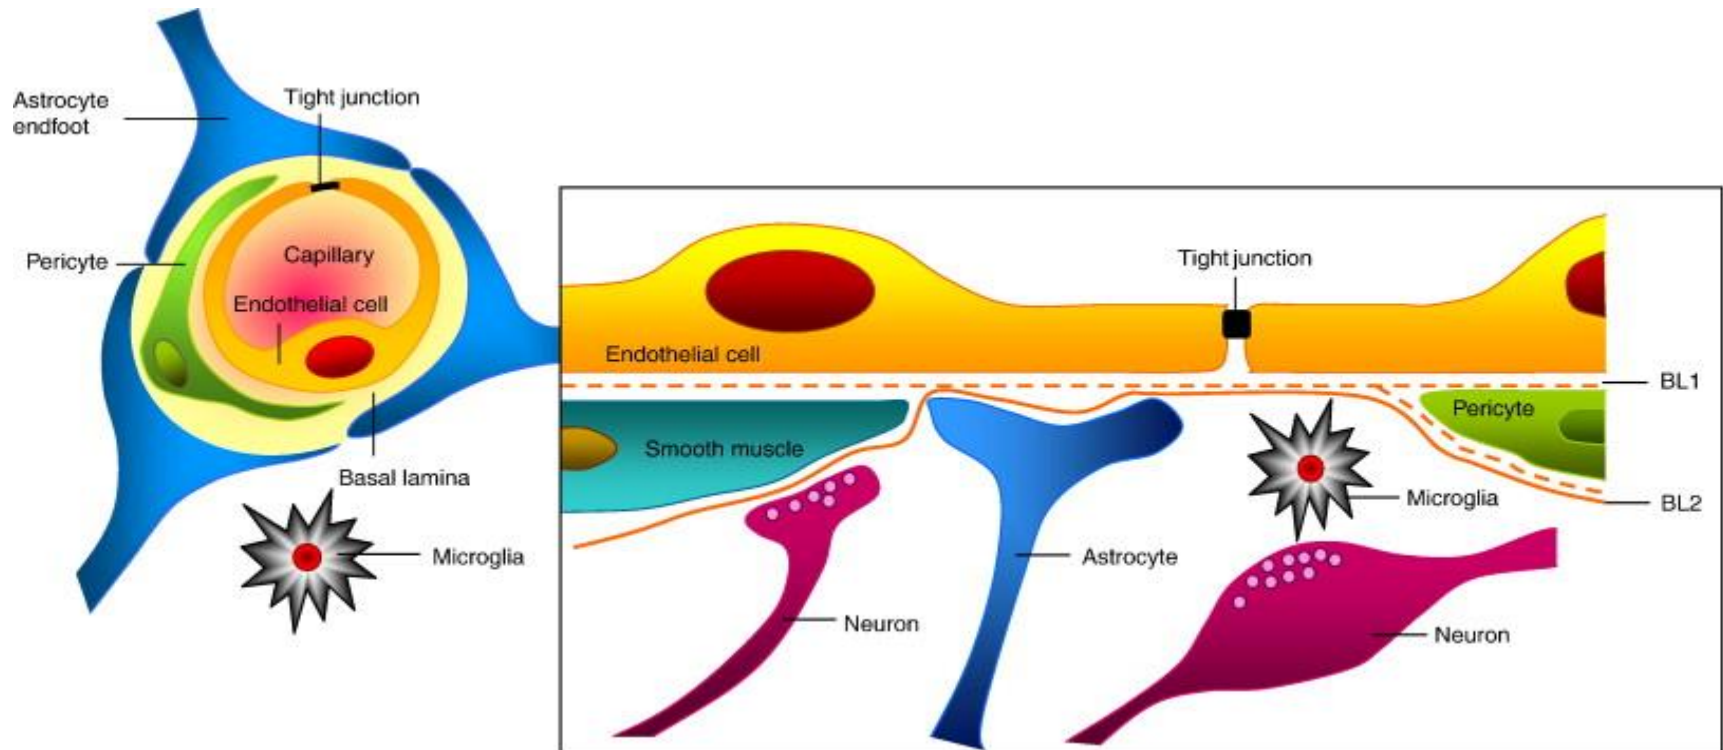

Neuro-inflammation is associated with a wide range of CNS diseases, including multiple sclerosis (MS), optic neuritis, non-infectious uveitis, acute disseminated encephalomyelitis (ADEM), neuromyelitis optica (NMO), as well as neuropathic pain, amyotrophic lateral sclerosis (ALS) and Parkinson's disease.

Introduction of 2B3-201

Effective drug delivery to across the blood-brain barrier (BBB)

Preclinical Study

在大鼠實驗的結果顯示，在注射8小時後，在腦中MP的量，2B3-201超過非微脂體的MP6倍以上。

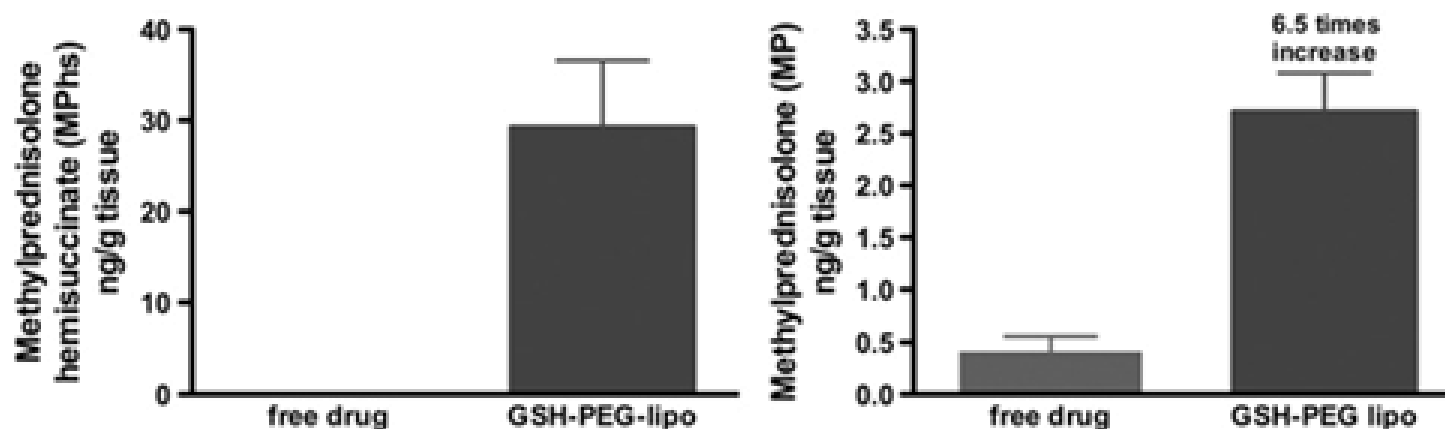

Fig. 3. Brain uptake of methylprednisolone hemisuccinate (left) and methylprednisolone (right). Rats ($n=4$ /group) received 1 bolus i.v. administration of 10mg/kg glutathione pegylated liposomal methylprednisolone (GSH-PEG lipo) or free methylprednisolone (free MPHs, 10mg/kg). Brain uptake was determined 8h after administration.

Preclinical Study

2B3-201: 藥效驗證試驗

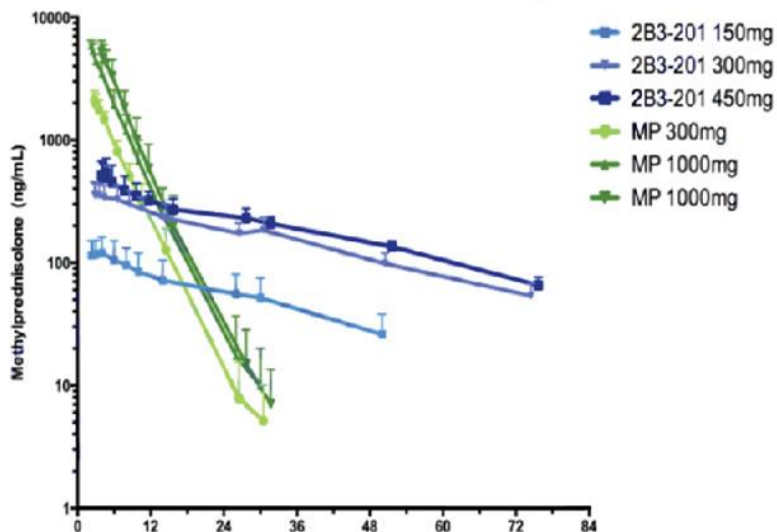

EAE-MOG mouse model of MS

Phase I Study (Solution)

Phase I dose-escalation results Pharmacokinetics

- Long circulation half-life of 2B3-201 (23~28 hrs) vs. MP (2.5 hrs)
- Reduced high peak exposure

Phase I dose-escalation results Effect on lymphocytes

- Rapid and sustained immunosuppressive effect
- Lymphocyte count crossed baseline within 7 days in all groups

Introduction of MS

Major existing choices for MS treatments (2014 Sales & Market Share in Value)

MS Therapies

- “ABCRE” products represented 64% of the global MS market in value in 2014
 - Moderate efficacy and patients continue to relapse on therapy
 - Require frequent injections
- Latest entrants represent treatment alternatives
 - Drives the benefit vs. risk discussion

17.20B	17.46B	17.72B	17.99B	18.26B	18.53B	18.81B	19.09B	19.38B	19.67B	19.96B

Development Strategies

■ 2B3-201's strengths

- *2B3-201 is a pegylated liposome which glutathione is attached on its lipid, while methylprednisolone as the main substance is encapsulated inside.*
- *Compared with the standard of care, i.e., a free methylprednisolone, 2B3-201 is an **one-shot** intravenous injection which brings **home-care convenience** and **better tolerance** to patients suffering acute multiple sclerosis relapses.*

Unit: USD/Billion

Multiple Indications

Synergistic Effect

- **Formulation development and commercial manufacture**

R&D formulation center of TTY has been studying liposomal formulation for more than 10 years and has succeeded in collaborating with J&J to produce a famous drug, Doxil/Caelyx. During cooperating with to-BBB, the initial prototype of 2B3-201 had been reformulated and produced by TTY's lab for Phase I clinical trials.

- **Development of clinical trials**

MS is a critical disease especially for whites. 2-BBB, an European company, has been devoting brain studies for more than 10 years to find a better option. Their deep and dedicated efforts made them more than qualified to design and execute the development of 2B3-201.

Biotech Success

Biotech Success Strategy (2017-2021)

● Marketing Development

- TS-1 、Painkyl 、Brosym(C+S) 、Episil 、Lonsurf 、Aplidin into peak sale
 - Liposome Doxorubicin into global peak sale
 - Liposome Amphotericin B
 - Risperidone PLGA
 - Leuprolide Depot
 - Colimycin
- } Complete listing for global (Including China market)
- 2B3-201 MS clinical trials Completed & NDA
 - Regional markets integration
 - Thailand ABT IPO

● R&D

- CMO/CDMO
- PLGA(Microsphere) Development
- 1-2 NCE/NBE Projects
- Dual Chamber-Filling System ready
